New cam for oil pump in overdrive on P 1800.

In order to increase the capacity of the oil pump, a new cam has been introduced on the oil pump for the above gearbox. This enables quicker and more positive engagement of the overdrive to be carried out.

The new cam has part number 380398 and can also be fitted in earlier overdrives.

The cam has been introduced on M 41 gearbox, part number 254211 with effect from serial number 300958.
