	H,K-series: 68956-131917

On certain cars there is a Q stamped on the chassis number plate. This is of no significance whatsoever as far as the ordering of spare parts is concerned.

The cars are fitted with B4B engines which have Part No. 495301 up to engine No. 109484 and Part No. 495302 from engine No. 109485 onwards.

There is an index on pages 1 - 4 where the parts can be found in the main component groups into which the catalogue is divided. At the end of the catalogue there are an alphabetical register and a numerical register.

Always state the model designation, chassis number and engine number when ordering spare parts.

Both the model designation and the chassis number are stamped on a plate on the front of the cowl.

The engine designation and number are stamped on a plate on the right-hand side of the engine.

Certain larger units are designated "complete". The separate components tabulated under anyone of these units are integral with the unit concerned and need not be ordered separately. The other tabulations in the text are to show the relationship of the parts to one another from the point of view of fitting.
